

How do HOT lanes work? How much will it cost me?

- As the HOT lane gets crowded, the toll goes up, fewer people choose to enter the HOT lane, and the level of traffic balances out.
- Tolls change based on congestion. When the lanes open, the price will likely be between \$1.00 and \$1.75 per trip.
- As vehicles move into the HOT lanes, WSDOT will monitor speeds to ensure traffic keeps moving.
